Adjustable hinge range for flush fit doors

# Hinges suitable for flush fit technical doors

## Adjustable hinges for flush fit doors

The Just 3D hinge has been developed to meet the requirements of both public and private sectors, to have a flush fit adjustable hinge technically state of the art.

Just 3D is easy to fit and to adjust: +/-2,5mm in height, horizontal and gasket pressure. Adjustment is simple and can be carried out by one person using a 4mm Allen key.

Just 3D is not only aesthetically pleasing and fully adjustable, it also offers a guarantee of long term, trouble free functionality. Self lubricating bushes ensure smooth, long term operation, which has been tested in accordance with EN 1935. Just 3D has achieved a load rating of 140 Kg in this test.

- Just 3D on timber 4
- Just 3D on steel 8
- Just 3D for glass doors 12

## Just 3D adjustable hinge

**For application on solid timber and cover frames.**

Being of symmetrical design, Just 3D suits both left and right handed applications. Security screws ensure suitability for both internal and external doors.

The range of components, enables Just 3D to be applied to steel, solid timber and cover frames. A steel support will be supplied for cover frame applications, which must be fastened on the back of the frame.

To give doors more added value, all visible components can be produced in stainless steel. The steel version is available in zinc and matt nickel finishes.
