

HECO-TOPIX®-plus Connector screws

Product information

General

- Perfectly adapted thread lengths for an optimal load transfer of the wood connector
- Reduced edge and centre distances
- Component of the Pitzl Calculation Software
- Various full threaded applications are possible
- Approved and monitored product (CE-marking)

Flange head

- Higher load transmission due to the increased clamping surface of the head
- Planar pressing against the timber connector
- Thicker shank for a better centring of the timber connector

Countersunk head

- No damage to the fitting surface due to milling grooves

The ideal screw for use in wood connectors

Flange head

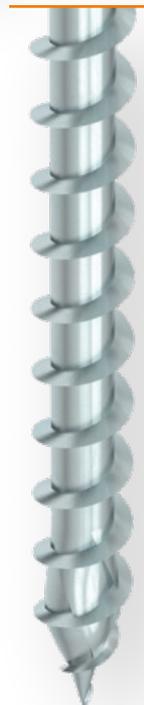

Countersunk head with milling grooves

GripFit®

Single-handed working possible thanks to the HECO-Drive

PerfectPitch®

Optimal thread pitch for every screw length

HECO-TOPIX tip

Eliminates the need for pre-drilling, reduces the risk of the wood splitting
